This material reflects the analysis and opinions of the speakers as of July 7th, 2026, and may differ from the opinions of portfolio managers, investment teams or platforms at Franklin Templeton. It is intended to be of general interest only and should not be construed as individual investment advice or a recommendation or solicitation to buy, sell or hold any security or to adopt any investment strategy. It does not constitute legal or tax advice.

The views expressed are those of the speakers and the comments, opinions and analyses are rendered as of the date of this podcast and may change without notice. The information provided in this material is not intended as a complete analysis of every material fact regarding any country, region, market, industry, security or strategy. Statements of fact are from sources considered reliable, but no representation or warranty is made as to their completeness or accuracy.

WHAT ARE THE RISKS?

All investments involve risks, including possible loss of principal. The value of investments can go down as well as up, and investors may not get back the full amount invested. Equity securities are subject to price fluctuation and possible loss of principal. Fixed income securities involve interest rate, credit, inflation and reinvestment risks, and possible loss of principal. As interest rates rise, the value of fixed income securities falls. International investments are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in emerging markets. Investments in companies in a specific country or region may experience greater volatility than those that are more broadly diversified geographically. Treasuries, if held to maturity, offer a fixed rate of return and fixed principal value; their interest payments and principal are guaranteed.

Active management does not ensure gains or protect against market declines.

There is no assurance that any estimate, forecast or projection will be realized. Investors cannot invest directly in an index, and unmanaged index returns do not reflect any fees, expenses or sales charges. Past performance does not guarantee future results.

Any companies and/or case studies referenced herein are used solely for illustrative purposes; any investment may or may not be currently held by any portfolio advised by Franklin Templeton. The information provided is not a recommendation or individual investment advice for any particular security, strategy, or investment product and is not an indication of the trading intent of any Franklin Templeton managed portfolio.
